

# SERENO UPGRADES

## HARDWARE UPGRADES

Hardware colours are an important aspect to a bathroom if you want to highlight fittings consistently in the space. Backed by a 10 year warranty, Crest's anodising and coating systems mean we can coat in an almost unlimited range of finishes.

The upgrades are priced into 3 tiers, from coloured powder coating through to anodised metal finishes. Crest colours all hardware components on each Sereno shower.

Powder coating is a painted application, with varying ranges of finishes from matt through to gloss and metallic. Anodising is a process where the metal finish merges with the outer layer of the hardware, allowing for a more polished feel.

For colours matching the Buddy tapware range, contact Crest Shower Systems and enquire about our Designer Series.

## Buddy DESIGNER SERIES

### TIER 1 / /

Tier 1 is an anodised coating and is our most popular upgrade option, available for immediate despatch.

#### BLACK

### TIER 2 / /

Tier 2 hardware colour upgrades are Dulux Powder Coated finishes. Colours shown here are a popular selection only. For all colour options please visit:
