FREE STANDING BATH Installation Instructions

Important

Please read the following instructions carefully before commencing installation

BEFORE INSTALLATION CHECK THAT YOUR ATHENA BATH IS COMPLETE AND UNDAMAGED

Installation

For optimum results the bathroom floor should be level. To aid installation the use of a HEPVO (Hepflex) flexible waste is recommended

1. Athena free standing baths are supplied on an integrated support with adjustable feet. Place the bath in the desired position (Note - waste placement and plumbing requirements should have been determined and prepared by this stage)

Once in the desired position adjust the bath feet so that the baths acrylic surround is touching the floor.

2. Using a spirit level check to ensure the top edge of the bath is level. If necessary use the levelling feet to adjust. Adjusting the feet will cause the acrylic surround to lift off the floor.

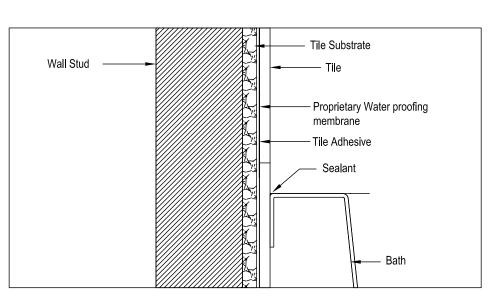

3. To stop the bath from sliding once installed, cut and fix treated timber cleats to the floor. To obtain the correct position measure the inside cut out of the acrylic surround and place the cleats in the positions accordingly.

- 4. Connect the waste and lower the bath into position.
- 5. As an option, once the bath is in its final position the acrylic surround may be sealed to the floor using a sanitary grade silicone. Masking the surround and floor will ensure a neat finish.
